# Caprice refrigerated wine cooler facts & figures

## SIMPLE CLEANING

More hygienic than any other similar dispenser on the market today. Just remove the tap assembly by slackening the thumb screw and then immerse it in a good sterilising solution (such as beer line cleaner).

Much easier than the awkward and messy flushing routine needed on machines with flash chillers.

## DIMENSIONS

Autonumis Bag in Box Dispensers are simple to install and only require connection to a correctly wired and fused 13A power point.

They may be wall mounted on a solid wall with suitable fixings or, alternatively, can be mounted on optional support feet.

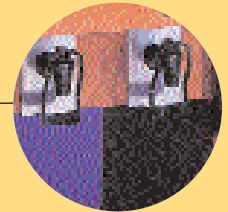

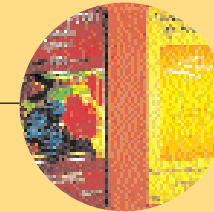

**Dispenser weight 52 kilos(packed)**

## ADDITIONAL FEATURES

Our new dispenser chills and maintains the stored wine at pre-set temperature right the way through to the dispense taps.

Tastefully finished in a natural wood surround, our dispenser offers excellent point-of-sale display opportunities on its large illuminated fascia area. The entire display can be customised to suit the needs of each vintner.
