electronic small pack vendor

facts & figures

All columns are adjustable and can easily be removed for re-sizing or stocking thanks to the thumb-wheel adjusting system that requires no tools.

Equipped with a reprogrammable coin mechanism and control board to offer the greatest functional flexibility for the operator. Optional reprogramming devices are available to ensure full compatibility with the latest coin-set.

Reinforced steel back plate and lateral reinforcement protect both stock and cash. The wide use of stainless steel in the front cover will blunt drills and cutters and enhance machine security.

Flashing push buttons light sequentially when product is available. Clean and clear front display and instructions ensure that users can easily make their purchase in the shortest possible time.
